

MWU VPN

MWU has implemented a VPN solution to provide easy to use, secure access to on-campus resources from internet connected devices using the **GlobalProtect** VPN client. VPN users **must enroll** using our Microsoft two factor authentication system. Enrolling a device provides greater security verifying users.

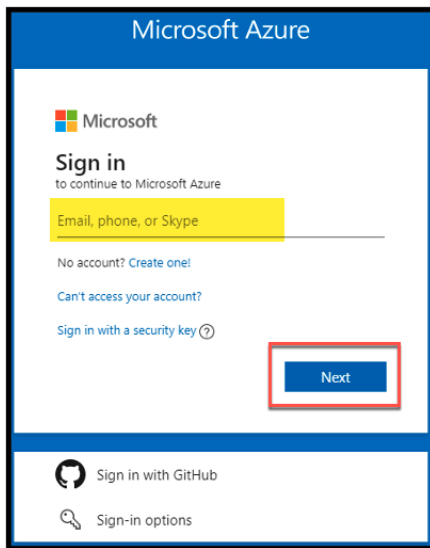

NOTE: The VPN is not accessible from the MWU internal network, it can only be accessed from an internet connection off campus.

MFA ACCOUNT SETUP

Learn how setup an **MFA Account** on both your desktop and mobile device.
If you have already created an MFA account for email, skip to the section for setting up the VPN client

DESKTOP SETUP

1. Log into portal.office.com.
2. Enter your **MWU email address**. Click the **Next** button.
3. Enter your **MWU password**. Click the **Sign in** button.
4. Click the **Yes** button.

8. With the **Receive notifications for verification** option selected click the **Set up** button. Click the **Next** button.

Additional security verification

Secure your account by adding phone verification to your password. View video to know how to secure your account

Step 1: How should we contact you?

Mobile app

How do you want to use the mobile app?

☒ Receive notifications for verification

☐ Use verification code

To use these verification methods, you must set up the Microsoft Authenticator app.

Set up Checking activation status.

Next

9. Open the **Microsoft Authenticator** application on your mobile device.
10. Tap the **More menu** icon (**:**) in the upper right-hand and select **Add account**.
11. Select **Work or school** account.
12. Select scan **QR code** and scan the **QR Code** with your phone.
13. Tap the **Next** button. Approve the request from your phone.

Configure mobile app

Complete the following steps to configure your mobile app.

1. Install the Microsoft authenticator app for Windows Phone, Android or iOS.
2. In the app, add an account and choose "Work or school account".
3. Scan the image below.

If you are unable to scan the image, enter the following information in your app.
Code: 254 338 999
Url: <https://mobileappcommunicator.auth.microsoft.com/mac/MobileAppCommunicator.svc/553736774>

If the app displays a six-digit code, choose "Next".

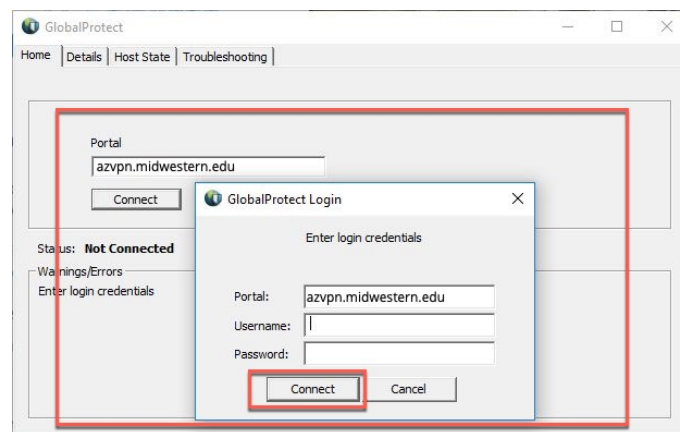

Next cancel

GET CONNECTED WITH GLOBAL PROTECT

1. Go to <https://ilvpn.midwestern.edu> or <https://azvpn.midwestern.edu> and enter your **MWU username** and **password**.

2. Clicking the **Log In** button will trigger the Microsoft 2 factor authentication. Acknowledge the prompt (or text message) that appears on your phone to continue.
3. **Download** and **install** the applicable version of **GlobalProtect** for your operating system.
4. Once installed, run **GlobalProtect** and enter the portal address **ilvpn.midwestern.edu** or **azvpn.midwestern.edu** with your **MWU login credentials** used in the previous step.

5. After clicking the **Connect** button, a Microsoft **authentication request** will be sent to your phone.
6. The Microsoft Authenticator **app** will display a prompt for the login request or you will receive a text message. Once approved, **Global Protect** will change to connected status.

DESKTOP SETUP

1. Depending on the operating system of your home PC
2. Enter your **MWU email address**. Click the **Next** button.
3. Enter your **MWU password**. Click the **Sign in** button.
4. Click the **Yes** button.

2. Clicking the **Log In** button will trigger the Microsoft 2 factor authentication. Acknowledge the prompt (or text message) that appears on your phone to continue.
3. **Download** and **install** the applicable version of **GlobalProtect** for your operating system.
4. Once installed, run **GlobalProtect** and enter the portal address **ilvpn.midwestern.edu** or **azvpn.midwestern.edu** with your **MWU login credentials** used in the previous step.
